Brilliant Whites and Radiant Natural Colours

110° Black Matrix Tube

This MODEL has the very special black matrix picture tube. This is the tube that gives you sharper contrast and greater colour brilliance.

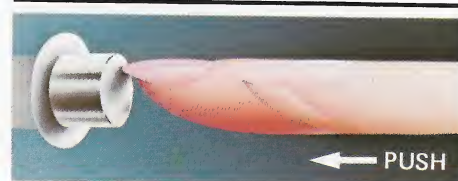

How it works!

There is a matrix of phosphor dots with a black filter and all scattered electrons — those which cause fuzziness and other picture disturbance — are absorbed by the matrix to give you crystal clarity.

JVC Developed Scene Control

This Scene Control makes colour scenes more lifelike by reproducing brightness values more accurately . . . just as the station transmits them. Eliminates "washed-out" look and gives greater detail and pure white in very dark and very bright scenes.

Automatic Fine-Tuning Control (AFC)

This advanced feature automatically adjusts the picture for fine tuning as you switch from one channel to another. A steady and sharp picture is always received regardless of changes in electrical power or channel.

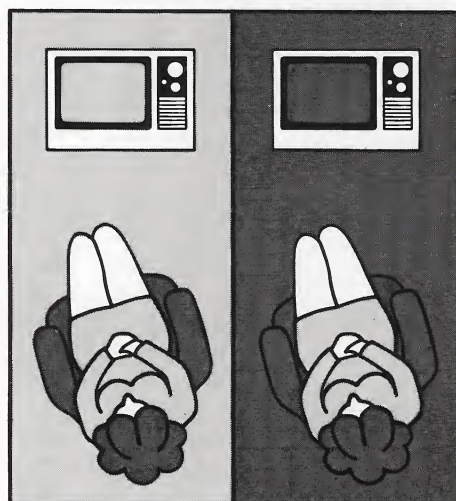

JVC-Exclusive EE Auto Control Ends TV Eye-strain

Electronic-Eye Automatic Control

Colour, Brightness and Contrast adjustment are all automatic.

Go easy on your eyes with JVC's Electronic-Eye Automatic Control. This advanced circuit automatically adjusts brightness, contrast, colour for the finest picture — no matter what the room lighting conditions. You never touch the control knob, but the set gives a bright picture in daylight, a darker picture in twilight. Another JVC innovation for picture perfect television.

Daytime (Bright)

Night (Dark)

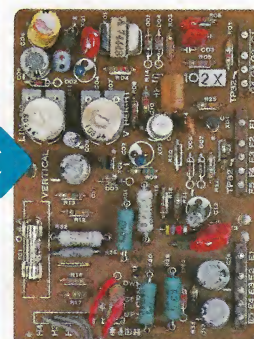

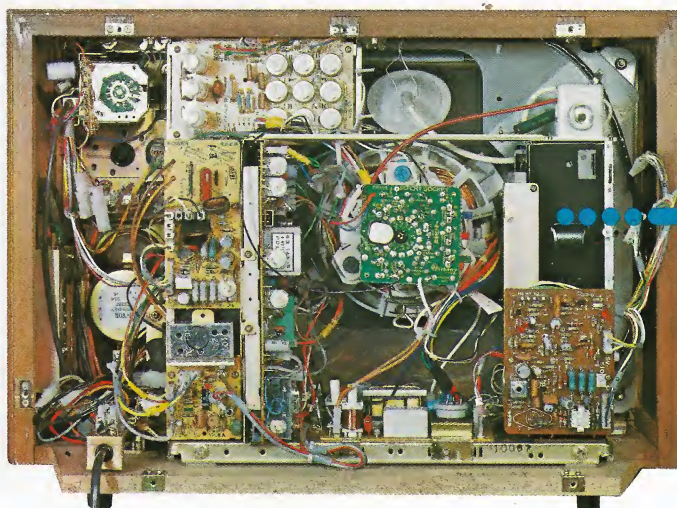

Elegant Styling

This JVC 18 inch Colour TV is as pretty as a picture — even when it's switched off. It's a truly slim-line model, thanks to the 110° picture tube, and the beautiful wood-grained cabinet blends harmoniously with any decor. The ultra-modern control panel adds the finishing touch to a set you'll be proud to own.

Reliability and Service

JVC Colour TV features a solid-state chassis with plug-in detachable printed circuit boards. The easy-to-remove panels ensure simple, fast service in the case of any malfunction and the unusual design of the chassis means servicing costs and time are reduced to an absolute minimum.

SPECIFICATIONS

Model	: 7350AU, 7350AUW
Picture Tube	: 18" 110° Black Matrix Tube
Type	: Full PAL Receiver, CCIR 625 lines
Power Source	: AC 240V, 50Hz
